TUESDAY, MAY 28, 1895.

It is expected that in a public address he is soon to make, Minister Thurston will convince his hearers that his political beliefs are unchanged.

IN THE California Episcopal Diocesan Convention at Los Angeles the church law was changed to allow women to vote for vestrymen and trustees.

Not the least interesting of the late advices by steamer brought seriously reports that Queen Victoria intended to abdicate on her birthday. The throne would go to the Prince of Wales as King Edward VII.

IT IS a noteworthy circumstance in the ebb and flow of the human tide that the volume of second and third class travel from the United States to Europe has so increased that all New York steamer lines have advanced the steerage rate. The fare one way has been \$10. Now it is \$15.

At Denver, Colo., Bishop Matz has deposed a priest for bad conduct which includes "dishonesty in politics." Bishop Matz should be vested to deal with laymen guilty of the same offense and should be equipped with an international staff of agents and assistants. His bureau would be a busy one.

SPAIN has made ample and satisfactory apology for the Alliance affairs. She remarked, on the side as it were, that there were many people in the United States openly sympathizing with and assisting the Cuban rebels. It is always in evidence that a large section of the citizenship of the Big Republic assumes to regulate the government of the earth.

A CABLE from Rome to New York says that Pope Leo XIII has ordered his tomb. He has given a commission to Maroni, the most famous sculptor in Italy. This fact, and the recent deliverance to the Cardinals of a political letter concerning the affairs of his entire reign, are considered proof that the head of the Catholic Church is impressed with the realization that his remaining days are few.

SOMETHING wholly and entirely new has confronted the industrial experts and political economists. They fail utterly at an attempt to analyze the occurrence faced. Carnegie, the Pennsylvania iron king, voluntarily advanced the wages of all his employees to ten per cent. The American Iron Company, with 4000 men on its rolls, has followed suit. All this is probably a conspiracy to make the workmen satisfied in spite of the walking delegates.

IN a dispatch to the New York Tribune from London, G. W. Smalley throws this light on the Nicaragua affair: "If President Cleveland had been disposed to justify his action, or had felt at liberty to publish the pledges he had received from England, he had ample material. The papers will be printed some day; if all of them are printed they will be found to contain categorical assurance that England, so far from seeking to annex Nicaragua, would not accept it as a gift."

WE ARE not required to await the completion of the Nicaragua Canal to witness a very heavy and rapid growth in the commerce of the Pacific and consequent direct and indirect benefit to this port and the islands. There going to be developed almost at once a great trade between Pacific ports of the United States and China and Japan. J. J. Hill of the Great Northern Railway will soon institute a service of five new Steamers between Seattle and the Orient. San Francisco is yet to speak and act. This means a Pacific cable and stimulation for Hawaii.

MENTION was made recently in THE STAR of the various circulars issued in British colonies by Pacific cable promoters. These are of a most plausible nature, tending to show that the cable would be a paying affair from the start, and that if Great Britain, Australia and Canada does not move quickly, America will forestall them. Some of the colonies guarantee, besides a bonus, that trade equal to the entire trade now going over the Asiatic route will be sent by the Pacific route. In 1890 Australasia cable 827,275; in 1891 1,275,191 words. They guarantee, in the face of reduced rates, that 1,500,000 words at least will be sent by the Pacific route, the receipts for which must be \$116,631. The feeling in favor of the Pacific cable is spreading and not a colony in Australasia will withhold a bonus.

## Timely Topics.

May 27, 1895.

In Utah and the adjoining states and territories there are about 500,000 Mormons. These people control the politics in their localities and by possession of the balance of power are a factor in national elections. The Mormons in Utah are quite as interesting as memories of the Romans or Egyptians. Whatever may be said of the religion the fact remains that they are an interesting and progressive people. With Brigham Young in the presidency they became very aggressive, at one time openly defying the authority of the United States. Young was in his measure quite as much of a man as any Caesar. In the first place he was an usurper. The church headship should have gone to the son of Joseph Smith, founder of the sect. Young Simply assumed and held it. So great was his force and ability that the real Mormons, such as the congregation in this city, are generally known as the dissenters, while the organization to which the settlement on the other side of Oahu accounts is rather considered the original body.

The contrary is the fact. Young introduced polygamy, which was disclaimed but a few years ago by the venerable Wilford Woodruff. Within the personal knowledge of the writer President Woodruff has given to his people "revelations from Heaven" and the same have been received. In the authentic history of the church it is stated that John the Baptist appeared to Joseph Smith and a companion and ordained them as priests. Salt Lake, the Mormon capital soon to become a state capital, is a magnificent city. The Temple was dedicated a couple of years ago after being forty years in course of construction. The Tabernacle, an ordinary auditorium, on the same lot seats 10,000 people. It has a gallery, but the pulpit view is unobstructed. The acoustic properties are such that the experiment of "dropping" a pin is actually performed. At common services there are 250 voices in the choir, on special occasions, 500. The organ sends out a volume of music that twenty brass bands could not equal. Most of the time the sermons are very plain. The people are told their duties as citizens and church members. They seem a happy, contented lot with firm belief in their leaders and their doctrines.

Among the many improvements made this year has been the cleaning up and painting the business blocks owned by Mr. James Campbell, the Campbell block, the old Masonic building, the Beaver block, and the Williams building, all on Fort Street.

The contract for painting the buildings was awarded to Mr. C. Sterling, who has had the painting and decorating of most of the large buildings in Honolulu, and conducts one of the largest and best painting establishments in the city.

When Mr. Sterling put his men to work, he found the buildings dirty, paint partly scaled off and everything in a very poor condition to put paint on. The walls were given a brushing and oil coating, the paint on the iron shutters and wood work was heated and scraped off and finally all was ready for a new dress.

The white lead and colors were furnished by us and were from that reliable Coast firm of W. P. Fuller & Co., celebrated for the quality of their Pioneer White Lead. The white was darkened to a pale yellow or cream and applied to the walls. We sell tons and tons of their paints and paint material every year.

For the iron awnings and shutters was used a paint that we desire to be noticed by all who use corrugated iron in building and for iron shutters. This paint is one of the best we know of for exposure to all kinds of weather. It will not scale or dust off, and the color is a dark red, pleasing and attractive to the eye. It is a metallic paint, having a large proportion of iron in its composition. It is mined in Nevada, and ground and mixed into a paint that can not be excelled. Iron mills and plantation buildings that are close to the sea and thereby subject to the ravages of salt when coated with our metallic paint will stand for years—of course we do not mean that one coating will do this but our paint will last much longer, in fact very much longer than any other kind of metallic paint we know of. We would like all persons who are thinking of using iron paint to examine the paint on the shutters of the Campbell buildings, come into our store and we will tell you all we know about it and try and show you the superiority of our paints.

THE HAWAIIAN HARDWARE COMPANY.

## WHY PAY RENT

When you can apply the rent money to purchase a house?

We will sell you a house to be built to suit you by paying monthly installments.

Call and examine our plan and satisfy yourself that our proposition is one which will be fully satisfactory to you.

THE HAWAIIAN SAFE-DEPOSIT AND INVESTMENT COMPANY,  
408 FORT STREET, HONOLULU.

## THE HOUSEHOLD.

Spots and Stains That Deface Our Winter Garments of Wool and Silk.

One of the best preparations for taking out greasy stains is made by a mixture of a pint of doctored kerosene, one-half dram each of chloroform and alcohol and a little good cologne. Apply to coat collars and black garments with a piece of silk. In washing solid black goods use a tablespoonful in each gallon of water. It will not injure the most delicate silk fabrics.

For spots on woolen goods one rule must be remembered. Alkalies are removed by diluted acids, like citric acid, while discolorations caused by acids require their opposites, such as diluted spirits of hartshorn. Too great care regarding the strength of all solutions and the manner in which they are applied cannot be insisted upon.

Grease can often be removed by repeated applications of blotting paper and French chalk to the wrong side of woolen goods. Grease upon carpeting will require half a cupful of fuller's earth and the same amount of magnesia, dissolved in a pint of boiling water. Apply hot and brush off when dry. Small spots can be obliterated by means of a hot iron and blotting paper. Fresh ink stains can be washed from carpets as from other goods by sweet milk. When dried, the carpet must be wet, then rubbed with salts of lemon and washed immediately afterward.

Silk goods, in the main, receive the same cautious treatment as that given to woolens. Fats may be treated with benzine, ether and soap in a very weak solution. Turpentine should not be used upon silk unless it be black silk. Acid and alkali, on all fabrics yield to the general rules already given. A current of water falling from a height upon the reversed side of the spot will help erase it. Good housekeeping, which is the foregoing directions, calls attention also to the fact that whatever applications are made care must be exercised in regard to leaving outtings of the stain, which must be rubbed with a soft cloth while drying.

## An Open Window.

The effect of a cornice over a window is often hard and unpleasant, and there is a satisfaction in sometimes avoiding even the simplest and convenient plan. Many people would cast their minds if they could only find a suitable device, such as the accompanying one of THE HOUSEHOLD.

AN ARTISTIC ARRANGEMENT.  
Decorative and functional, by which to dispose of the drapery. This is a simple and novel way of draping a window without introducing the clumsy looking metal or wooden cornice.  
Take a piece of wood and shape it the desired size. Saw an oval hole in it if possible and then hang two or three footings of drapery from rings on the face of the board, in the manner indicated. This will hide the cords from the room which the hanging curtains are suspended, which will be fixed between the architraves of the window or door which is being draped.

Take 2 cupfuls of mashed potatoes, and while they are hot stir into them a teaspoonful of butter. When cool, add 2 cupfuls of flour, enough milk to make a soft dough and about 2 tablespoonfuls of yeast or one-fourth cake of compressed yeast in 2 tablespoonfuls of warm water. Knead for a few minutes and set to rise overnight in a not too warm place. In the morning roll out, cut into biscuits about an inch thick and set in a warm place to rise. When light, bake in a hot oven from 10 to 20 minutes. The dough must be made very soft to insure success. Be sure not to cut them at the table.

## Easy to Make and Easy to Peel.

It is well to remember, according to Good Housekeeping, that a baked custard is one of the easiest things to make and one of the easiest to spoil in baking. If left to its own devices. It must be made of fresh materials, and takes better to a shallow dish than in a deep one. The dish containing it should be placed in a shallow tin dish holding hot water, and the oven must be moderate. Watch it, and just as soon as the blade of a knife comes out clean when you try it take it out. If you leave it longer, it will be water.

## One Thing and Another.

It is a good plan, when possible, to set a summer in all china or brass ornamental pots for the plants to stand on. It is easier to lift them out and empty the superfluous water, unless the pots are always removed for the process of watering—and prevents the roots getting saturated. Even tiny pots can be treated in the same way, using small plates or dishes from old toy sets, etc.

A tablespoonful of powdered borax in a pail of water will keep fine white flannels from turning yellow in the washing.

## If varnish is defaced and shows white marks, take linseed oil and turpentine in equal parts. Shake them well in a vial, and apply a small quantity on a soft piece of cotton until the color is restored. Then wipe the mixture entirely off.

## For the shrinkage of unbleached muslin allow an inch to the yard.

Old time takes better than new ones.

## Hiding the Clothesline Post.

The posts that support the clothesline may be useful enough, but they are unsightly objects on the back lawn. Why not hide them in a network of vines and make them ornamental?

A simple trellis, like one sketched for American Gardeners, may be erected around each pole and some hardy quick growing vine trained upon it until it is quite concealed. The line will easily pass over the meshes of the vine without doing it harm. When the vines are well grown, it will be surprising to see how pretty the stiff, ungainly posts have become quite attractive features in the home landscape.

## Just as Good.

"I should think you'd miss your watch drastically," said the confidential friend sympathetically.  
"Oh, no," replied the philosopher serenely. "When I want to know what small is, I just take out the pawn ticket and look at the nearest clock."—Chicago Record.

## Boast almonds at dinner parties are obsolete.

The fashionable caterers say they have been done to death.

## ELEVENTH Annual Meeting

—OF THE—

HAWAIIAN JOCKEY CLUB

JUNE 11th, 1895.

## OFFICIAL PROGRAM.

Races to Commence at 10 a. m. sharp.

## 1ST—BICYCLE RACE.

Prize: Gold medal, valued at \$20. Entrance fee \$1.50, 1 mile dash. Free for all.

## 2nd—BICYCLE RACE.

Prize: Gold medal, valued at \$20. Entrance fee \$1.50, 3 mile dash. Free for all.

## 3rd—HONOLULU PURSE \$300.

Running Race, 1/2 mile dash. Free for all.

## 4th—MERCHANTS PURSE \$200.

Trotting and Pacing to Harness; 2 mile dash. Mile heats, 2 in 5. Free for all.

## 5th—PONY RACE, PURSE \$100.

1 mile dash, for all ponies 14 hands or under.

(Will be run between heats of No. 4.)

## 6th—KALAKATA CHALLENGE CUP, \$250 added.

Running Race, 1 mile dash. Free for all. Winner of Cup to beat record of 1:10, in heat of cup.

## 7th—KAPOLANI PARK PURSE, \$250.

Trotting and Pacing to Harness; 2 mile dash. Mile heats, 2 in 5. Free for all.

## 8th—OCEANIC S. S. CO.'S CUP, \$150 added.

Running Race, 1 mile dash. Hawaiian bred.

## 9th—KALAKATA CUP PURSE, \$150.

Running Race, 1 mile dash. Hawaiian-bred horses owned by members of the club. Winner to accept \$100, in heat of cup.

Cup becomes the property of person winning it twice. Should the person who has won it once and again the meeting, he will receive in lieu of Cup \$100, together with \$150 added. Winner of Cup first time will receive \$100 and credit for one race.

## 10th—HAWAIIAN JOCKEY CLUB PURSE, \$150.

250 class. Mile heats, 2 in 3. Free for all.

## 11th—PRESIDENT WIDEMANN'S CUP, \$150 added.

Running Race, 1 1/4 mile dash. Free for all.

All entries are to be made with the Secretary, before Thursday, June 6th, 1895. Entrance fees to be 10 per cent. of Purse, unless otherwise specified.

All races are to be run or trotted under the rules of the Hawaiian Jockey Club.

All horses are expected to start unless withdrawn by 9 o'clock a. m. on June 10th, 1895.

General admission, 50 cents. Grand stand (extra) 1.00. Carriages (inside of course) each, \$2.50. Quarter stretch badges, \$5.00.

S. G. WILDER, Secretary Hawaiian Jockey Club.

## THE HOUSEHOLD.

A Violet Room Suggests the Dainty Freshness of Spring.

It was to be a "violet" room, but there were difficulties to be overcome. It was in a city house, and its only outlook was across a narrow alley. The window was wide and had great capabilities in the matter of curtains. The room was 15 feet square and disproportionately high. The furnishing, therefore, must give the effect of space, light, air and provide sufficient beauty to satisfy the eye that the want of outlook would be unnoticed. The Decorator and Furnisher tells that the conditions were satisfied in this way.

The wall was covered with a delicate blue paper, on which were scattered bunches of violets with tiny gold ribbons. The apparent height of the ceiling was lowered by a frieze of violets edged by a narrow gold molding. The ceiling paper was of the same faint blue decorated in interlacing gold rings. The carpet was of white moquette, thickly covered with small pale green leaves and tiny gold shadows. A chifferoni, solid table and washstand of white maple, a brass bed, two chairs and a white wicker rocker were all the furniture the space allowed.

The bureau and toilet covers were of white linen embroidered with violets. The china, of cream white, was decorated in violets and gold. The whole suggestion of the room was the freshness of spring.

## Macaroni With Mustard.

Break in pieces and wash in cold water one-half pound of macaroni. Throw it in a bowl of rapidly boiling water, add salt and boil very fast for 20 minutes. When done, put in the colander to drain. Put a quart of milk into double boiler. While boiling stir smoothly together 4 tablespoonfuls of flour, 3 heaping tablespoonfuls of butter and half a teaspoonful of dry mustard. When smooth, stir carefully into the boiling milk and continue stirring till it thickens. Salt to taste. Put the macaroni into a baking dish, pour the sauce over it, cover the top thickly with grated cheese and bits of butter and bake in a quick oven till nicely browned.

## Metatarsalgia.

Metatarsalgia, or fourth toe disease, has been the subject of much scientific discussion. Many patients have been operated on, the operation consisting of the removal of a portion of the bone of the toe, which had become highly inflamed. A new form of treatment is that of shaping the shoe that the weight will not come directly upon the ball of the foot, but slightly back of the ball, and this is secured by making the ankle and instep close fitting and the toe and ball very broad and easy. One physician advises that a depression be made in the sole of the shoe just beneath the fourth toe, so that there shall be no pressure from any direction. This works well in some cases, but in others the surgical remedy is the only successful one.—New York Ledger.

## Pinhead (exactly).—What is thunder do you mean by publishing that obituary notice of me?—Mr. Yes.

The Editor (calmly).—Well, well. It does look that way, doesn't it? You see, I sent you more than 30 letters asking you to come in and pay something up the 14 year subscription you owe. I didn't get any answer or see anything of you, and I thought sure you must be dead. I wrote you so, and I'll print extraction fees of charge, Thanks. That's just the right change. Come in again.—Pinecone Companion.

## Boast almonds at dinner parties are obsolete.

The fashionable caterers say they have been done to death.

## Press the Handle; the Rod Curls Your Hair.

Do you use hair-curlers? We will assume that you do, are not satisfied with the one you are using, and that you would be pleased to learn of something better.

We have an excellent assortment of Hair-curlers. Some of the old kind have come vastly improved in style and usefulness. Some have dainty bone handles, some wood and some all metal.

An ingenious Yankee has hit upon a plan to obviate the tiresome turning of the irons. The Automatic Curler has a device requiring simply the pressure of the handles to cause the rod to turn automatically and curl the hair. It is done so quickly one heating is sufficient to curl the hair. By the turning of a clasp the rod will revolve in the opposite direction and it's all done in a minute, too.

Let us show you these Curlers.

## NOBRON DRUG CO., Druggists.

820 FORT STREET.

HONOLULU.
